NEXHUB-NH

Smart Zigbee Gateway · Zigbee 3.0 · Mobile App Control

Product Overview

The NEXHUB-NH Smart Hub is a compact Zigbee gateway designed to connect and manage multiple smart devices within the ecosystem. It acts as the central communication bridge between Zigbee devices — sensors, switches, and alarms — and the cloud, enabling remote control, automation, and real-time monitoring via the Smart App. Ideal for residential and light commercial applications, it ensures stable, low-power, and scalable smart home networking. With built-in Alexa voice control, users can manage lighting, curtains, scenes, and devices using both touch and voice interaction.

Key Features

- **Zigbee 3.0 Gateway**
  Supports Zigbee 3.0 protocol connecting multiple sub-devices with low latency and stable communication.
- **Smart Ecosystem Integration**
  Works with the Smart Life App for remote control, monitoring, and scene automation.
- **Multi-Device Support**
  Connects sensors (motion, door/window, smoke, presence), smart switches, curtains, and AC units.
- **Built-in Alexa Voice Control**
  Manage lighting, curtains, scenes, and devices using voice commands — no separate hub required.
- **Compact Plug-and-Play Design**
  Small and lightweight form factor with USB 5V power — quick and easy desktop or plug-in installation.

Technical Specifications

Model	NEXHUB-NH
Type	Smart Gateway
Protocol	Zigbee 3.0
Connectivity	LAN Connectivity
Power Supply	USB 5V
Control	Mobile App
Installation	Desktop / Plug-in
Operating Temp.	-10°C to +55°C
Dimensions	90 × 90 × 20 mm

Compatible Applications

- Smart Home
- Office & Commercial
- Sensor Networks
- Residential Apartments
- Light Commercial Use
- Automation Scenes

Works with: Smart Life App · Alexa Voice Control · Zigbee Sub-devices · Motion & Door Sensors · Smart Switches · Smart Curtains · Smart AC
